ABOUT ME

I am Licensed Computer Engineer.

EDUCATION & TRAINING

KATHMANDU, NEPAL

SECONDARY EDUCATION- NATIONAL MODEL ENGLISH SECONDARY SCHOOL

Level in EQF: 3

KATHMANDU, NEPAL

HIGHER SECONDARY EDUCATION- HERALD INTERNATIONAL COLLEGE

Level in EQF: 4

LALITPUR, NEPAL

BACHELOR'S DEGREE- LALITPUR ENGINEERING COLLEGE

Level in EQF: 6

LALITPUR, NEPAL

AWS ACADEMY GRADUATE - CLOUD FOUNDATIONS - TRAINING BADGE - AWS ACADEMY

07/07/2025 - 07/10/2025 - KATHMANDU, NEPAL

DATA SCIENCE WITH PYTHON TRAINING- BROADWAY INFOSYS

19/11/2022 - 29/11/2022 - LALITPUR, NEPAL

HARDWARE TRAININGSHIP- LOCUS

WORK EXPERIENCE

27/11/2025 - CURRENT - LALITPUR, NEPAL

LECTURER HIMALAYA COLLEGE OF ENGINEERING

- Delivered undergraduate lectures in **Data Mining and Data Warehousing**, covering data analysis, database technologies, and machine learning concepts.
- Conducted practical sessions involving **data analysis, data preprocessing, databases, and machine learning applications**.
- Mentored students on **academic projects and technical problem-solving**, providing guidance on analytical approaches and implementation.
- Evaluated assignments, laboratory work, presentations, and examinations while providing **constructive**

academic and technical feedback.

Email: info@hcoe.edu.np | **Website:** https://hcoe.edu.np/

14/06/2026 - 20/06/2026 - KATHMANDU, NEPAL

DATA SCIENCE TRAINER IIMS COLLEGE

- Delivered hands-on **Data Science and Python training**, covering data manipulation, preprocessing, exploratory data analysis (EDA), and visualization using **NumPy and Pandas**.
- Provided practical training in **machine learning workflows**, including feature preparation, model development, evaluation, and interpretation of results.
- Guided students through **end-to-end Data Science projects**, applying analytical and machine learning techniques to real-world datasets.
- Designed training materials, coding exercises, and project-based activities to strengthen students' **programming, analytical, and problem-solving skills**.

Email: info@iimscollege.edu.np | **Website:** https://iimscollege.edu.np/

SKILLS

Programming Language
Python (computer programming) | JavaScript | CSS & HTML | C++ | C programming language | use object-oriented programming

AI and Machine Learning
machine learning | deep learning | computer vision | Image and Video Processing, and Multimodal Analysis | feature engineering | modal evaluation

Data Science and Analytics
Data Science | Data Collection, Data Processing, Data Analysis, Data Visualisation | data engineering | Exploratory Data analysis | Tableau (data analysis): Base | Statistical analysis.

Python Libraries
Python - Numpy, Pandas | Scikit -learn | OpenCV | Python NLTK | Seaborn | Matplotlib | Tensorflow | Keras

Web Development and APIs
Streamlit | Fast API | MERN Stack (MongoDB, ExpressJS, ReactJS, NodeJS)

Databases
MySQL | PostgreSQL | MongoDB

Cloud Computing
AWS Lambda | Amazon S3 | Amazon ECS | Amazon API Gateway | Amazon EKS | Serverless Computing

Development Tools
Github | Google CoLab | Git | Jupyter NoteBook | VS code | LaTex

Professional Skills
Technical training | Research and Development | Problem Solving | Project Management | Team Collaboration | Technical Documentation

CERTIFICATIONS

07/10/2025 Broadway Infosys
Data Science with Python

29/11/2022 LOCUS
Hardware Fellowship Training

PROJECTS

CURRENT

Autonomous AI-Powered Business Intelligence Agent (Multi-Agent System) Designed and developed an AI-powered multi-agent Business Intelligence system that transforms natural-language business queries into automated data analysis and actionable insights. The system integrates specialized agents for user-intent detection, task planning, SQL generation, data analysis, anomaly detection, root-cause analysis, result validation, data visualization, and automated report generation. Built using Python, FastAPI, LangChain, OpenAI API, and Pandas, with a 50,000-record transactional dataset. **Development: 85% completed.**

Abalone SeaSnail's Age and Type Prediction Designed and developed a machine learning-based age prediction system for abalone using Python, Scikit-learn, and Streamlit. Implemented data preprocessing, feature engineering, regression model training, hyperparameter optimization, performance evaluation, and an interactive dashboard for real-time predictions.

https://abalone-seasnails-age-type-prediction.streamlit.app/

Water Quality Portability Test Developed a machine learning-based water quality potability prediction system using Python, Pandas, NumPy, and Scikit-learn. Performed data preprocessing, missing value handling, feature scaling, exploratory data analysis, and trained classification models to predict whether water is safe for drinking. Evaluated model performance using accuracy, precision, recall, F1-score, and confusion matrix, and built an interactive Streamlit web application for real-time water potability prediction.

Online Car Rental System Developed a responsive Online Car Rental System using HTML, CSS, JavaScript, and PHP. Designed user interfaces for vehicle browsing, user registration, login, and rental booking, and implemented a payment module with server-side form validation. Enhanced user experience through responsive design, interactive navigation, and dynamic web components.

Image Steganography Developed a secure application to conceal confidential text messages within digital images using image steganography techniques. The system enables users to hide and retrieve secret information while preserving the visual appearance of the cover image, ensuring secure communication and data confidentiality.

RESEARCH PROJECT

Multimodal Deep Learning for Automated Football Highlight Generation using 3D CNN and Whisper Transcription

Journal: Springer Nature (under editorial review)

Status: Editors Assigned (Manuscript under review)

Bachelor Final Year Research Project

Developed a machine learning system capable of automatically generating football highlights by combining audio, video, and textual information.

Key contributions:

- Extracted video frames and synchronized timestamps.
- Processed commentary transcripts.
- Performed event annotation for goals, fouls, corners, penalties, and free kicks.
- Developed an audio event detection model using CNNs and Mel spectrograms.
- Applied multimodal learning techniques for event recognition.
- Generated highlight clips automatically based on detected key events.
